

MELANIE MALEK

Software Engineer

(613) 890-4170 mmale102@uottawa.ca LinkedIn Portfolio Ottawa, Ontario

EXPERIENCE

Tools & Automation Software Developer (Co-op)

Nokia

- 09/2025 - 12/2025 Kanata, Ontario
- Developed and deployed web applications, dashboards, and scripts to enhance organizational workflows and support cross-functional teams
 - Designed, implemented, prototyped, and rigorously tested new frameworks and internal tools, improving scalability and reliability across systems
 - Worked extensively with industry-standard cloud and container technologies, including Kubernetes, Helm, OpenStack, Flask, Django, and Python, to build robust, modern infrastructure solutions
 - Delivered new platform features and extended functionality within existing frameworks, enhancing and accelerating daily workflows

QA Automation Tester (Co-op)

Global Affairs Canada - Government of Canada (Secret Clearance)

- 01/2025 - 04/2025 Gatineau, Quebec
- Developed, maintained, and executed automated test scripts using Selenium Java across multiple environments, including QA and PROD
 - Performed manual testing by identifying, logging, and tracking defects to ensure high software quality standards
 - Collaborated with cross-functional teams to analyze and resolve system issues, improving overall functionality and performance
 - Participated in daily Scrum meetings, providing progress updates, addressing blockers, and contributing to continuous improvement
 - Operated within an Agile environment, ensuring effective communication and alignment with development teams for streamlined project delivery

Programmer Analyst (Co-op)

National Defense - Government of Canada (Secret Clearance)

- 05/2024 - 12/2024 Kanata, Ontario
- Conducted system-wide setups in SAP to maintain optimal performance and reliability of production systems
 - Scheduled and managed batch jobs across various QA and Sandbox systems, supporting major and minor system software releases
 - Developed and implemented complex ABAP reports tailored to specific business requirements, including the creation and management of selection screens, internal tables, and data processing structures
 - Diagnosed and resolved runtime errors in internal programs, ensuring seamless operation using the SDLC
 - Integrated advanced error-handling mechanisms to enhance application robustness and user experience

SKILLS

Java	Python	JavaScript	Git	JUnit	Automation Testing
Object-Oriented Programming			GitHub	REST API	HTML
Azure DevOps	CSS	OpenStack	Django	SAP	Flask
Web Development	ABAP	Selenium	Unit Testing		
GitHub Copilot	Flask	Django	English	French	Arabic

EDUCATION

B.A.Sc in Software Engineering

University of Ottawa

- 09/2023 - 12/2027
- Admission Scholarship of \$3000

CGPA
9.0 / 10.0

COURSES

Software Quality Assurance - A+

Operating Systems - A+

Analysis & Design of User Interfaces - A+

Data Structure & Algorithms - A+

Introduction to Software Engineering - A+

Introduction to Computing I (Python) - A+

Introduction to Computing II (Java) - A+

Computer Architecture - A+

Professional Communication and Responsibility - A+

PROJECTS

Parking Lot Managing System

Developed a comprehensive system to manage parking lot operations, integrating advanced data collection from various file sources. Implemented features for real-time tracking of parking space availability and user notifications. Leveraged JUnit as the unit testing framework to write and execute test cases, ensuring the system's reliability and performance

Budget Buddy

Developed a dynamic marketing website with multiple pages, including Home, Pricing, Contact Us, and About. Designed a user-friendly interface and cohesive visual theme to effectively present the application to a group of CEOs, ensuring a professional and engaging user experience.
